ESSEX

DESIGN AND ACCESS  
STATEMENT

Revised - October 2022

*Shaping places for  
future generations*

# OAKLANDS MEADOWS SOUTH WOODHAM FERRERS

ESSEX

---

Oaklands Meadows comprises the significant majority of Land North of South Woodham Ferrers which is **allocated for development** as a Strategic Growth Site in the Chelmsford Local Plan, adopted in May 2020. Following the approval by Chelmsford City Council of the Masterplan, Countryside and Essex County Council Property Services are **submitting a planning application** for Oaklands Meadows.

# SUMMARY OF REVISIONS

## AMENDMENTS TO THE DESIGN AND ACCESS STATEMENT

Since the submission of this planning application, discussions in consultation with wider stakeholders have resulted in revisions to the proposals.

This revised Design and Access Statement has been updated in accordance with these revisions to reflect the key amendments to the proposed designs.

The amended elements within the Design and Access Statement document are described here. These comprise three areas in particular:

- **Parameter plans:** The parameter plans submitted as part of the application and described on pages 66 to 71 of this document have been revised;
- **Vehicular Access plans:** The vehicular access plans shown on pages 130 to 132 of this document have been revised;
- **Phasing plan:** The indicative phasing plan shown on pages 140 to 141 of this document has been revised.

All other material within the document remains unchanged. The amendments made to the proposed designs and shown within the Parameter plans, the Vehicular Access plans and the Phasing plan do not affect the design principles described and illustrated

elsewhere within the 'Design' section of the Design and Access Statement.

The following paragraphs describe the revisions made in more detail.

### Parameter plans

The five parameter plans forming part of this planning application have been revised to show some general amendments:

- Amendments to the extent of highways and access land reflecting the amendments to the detailed highways design. Most of these relate to the design of the realigned B1418 where it passes through the site, together with its junction with Burnham Road;
- Minor changes to the extent of development parcels, responding to the amendments to the detailed highways design. There is no change to the proposed quantum of development, nor the proposed quantum of developable land area;
- The omission of the Old Telephone Exchange, immediately adjoining the Crouch Vale Medical Centre, from the application site.

In addition to these general amendments, each of the plans show the following additional changes:

### Land Use Plan (page 67)

The Land Use Plan has been amended by changing the notation of 'Care Home' to 'Residential Care Use', to reflect the wider interpretation of care uses in the amended description of development. The broad location for this use remains unchanged.

### Residential Density Plan (page 68)

The Residential Density Plan has no additional amendments other than the general amendments previously outlined.

### Building Heights Plan (page 69)

The Building Heights Plan has been updated to remove reference to 2½ storey properties within the lower height zone, and also to remove reference to heights being +1/-1m over those shown, in the interests of clarity.

### **Access and Movement Plan (page 70)**

The Access and Movement Plan has been updated to show an additional potential cycle connection on the west side of Sainsbury's and an additional interconnecting pedestrian route, to facilitate easier walking and cycling access for residents on the west side of the site.

This plan also includes the revisions to pedestrian and cycle routing arising from the amendments to the detailed highways design. Most of these relate to the design of the realigned B1418 where it passes through the site, together with its junction with Burnham Road.

### **Landscape and Open Space Plan (page 71)**

The Landscape and Open Space Plan has been updated to show realignment of the proposed hedgerows along the B1418, reflecting the amendments to the detailed highways design.

### **Access plans**

Following on from discussions with the Highway authority, an updated Transport Assessment and detailed highways drawings have been submitted, including designs for the site access junctions and off-site works. For more details on the changes, please refer to the comprehensive Non-Technical Summary provided as part of the updated Transport Assessment.

The access plans within this document on pages 131 and 132, showing an overview of the site access junction and the detailed internal highways forming part of this application, have therefore been updated.

### **Phasing plan**

Following discussions with stakeholders including Natural England, the illustrative phasing plan on page 141 has been amended. These amendments predominantly show how additional land for recreation and associated recreational routes can be provided earlier within the phasing programme. They also bring forward the proposed delivery of the southern spine junction onto Burnham Road.

# SECTION 1 INTRODUCTION

This section introduces the site, summarises the planning policy context within which the planning application is submitted, and describes the purpose and structure of the Design and Access Statement

**OAKLANDS MEADOWS**  
**SOUTH WOODHAM**  
**FERRERS**  
ESSEX

# INTRODUCTION

## DESIGN AND ACCESS STATEMENT

Land North of South Woodham Ferrers was allocated for development within the Chelmsford Local Plan, adopted in May 2020. Within this document, it is referred to as Strategic Growth Site (SGS) 10 .

Subsequent to the adoption of the Local Plan, and following an extensive process of consultation with local and statutory stakeholders, Chelmsford City Council, working together with development partners led by Countryside, approved a Masterplan for Land North of South Woodham Ferrers in March 2021.

A planning application is now being made for development in accordance with the approved Masterplan on Oaklands Meadows ('the site'), which comprises the significant majority of Land North of South Woodham Ferrers.

This planning application is made jointly by Countryside Properties and Essex County Council Property Services, who together control the land within the site.

This Design and Access Statement (DAS) has been prepared by Broadway Malyan as part of a wider set of documents and drawings submitted in support of the planning application, and should be read together with these.

### The team

This DAS is based on work by the project team comprising:

- **Phase2 - planning**
- **Broadway Malyan - masterplanning and architecture**
- **David Jarvis Associates - landscape design**
- **Mayer Brown - highways and movement**
- **Aecom - drainage, highways and movement, services,**

**earthworks, socio-economics, health**

- **Geosphere - ecology**
- **RPS - archaeology and cultural heritage**
- **Turley - sustainability**
- **Bidwells - environmental impact assessment**
- **DevComms - consultation and engagement**

### Structure of this document

This DAS is structured as follows:

- **Section 1:** Introduction - introducing the document, the site, and the planning policy context within which the application is submitted;
- **Section 2:** Assessment - describing the site, its local and strategic context;
- **Section 3:** Involvement and evaluation - outlining the evolution of the proposed design through consultation with local and statutory stakeholders;
- **Section 4:** Vision and design principles - describing the Vision for the site and identifying key aims and objectives;
- **Section 5:** Design - describing the elements of the proposed design, explaining site-wide principles and more local key features;
- **Section 6:** Summary - restating the key components proposed and outlining the next steps.

### Description of development

This application is submitted in outline, with all matters reserved for future approval, but with full details provided for the principal means of vehicular access to the site, the initial phase of on-site highway works, strategic ground reprofiling, strategic surface water attenuation, and strategic foul drainage works.

The proposed development comprises:

- Residential development of up to 1,020 homes (Class C3);
- Up to 88 bedroom units of residential care use (Class C2);
- Up to 1,100 sqm GEA Neighbourhood centre (including retail uses) within class E and including a multi-purpose community centre;
- Up to 1,200 sqm GEA of other commercial uses falling within Class E (of which not less than 1,000 sqm to be business floorspace within Use Class Eg);
- 2 form entry Primary School and 2 no. 56 place Early Years facilities;
- 5 serviced plots for Travelling Showpeople (GEA 10,000 sqm);
- Open spaces and other landscaped areas, including parks, play areas, wildlife habitat areas, allotments, community orchards, formal/informal open space, playing fields and associated ancillary maintenance buildings, structures and pavilion;
- All associated highway infrastructure, including means of vehicular access to the site and all internal roads and service areas;
- Pedestrian, cycle and bridleway routes (including partial extinguishment of Bridleway 25);
- Vehicular and cycle parking to serve the proposed development;
- All drainage works including foul drainage infrastructure, Sustainable Urban Drainage Systems including ground and surface water attenuation features;
- Ground reprofiling works;
- Demolition of existing building;
- All associated ancillary works including services and utilities.

## PLANNING POLICY CONTEXT

The planning policy context within which the application is submitted is summarised here. For fuller details, please refer to the Planning Statement submitted as part of the application documents.

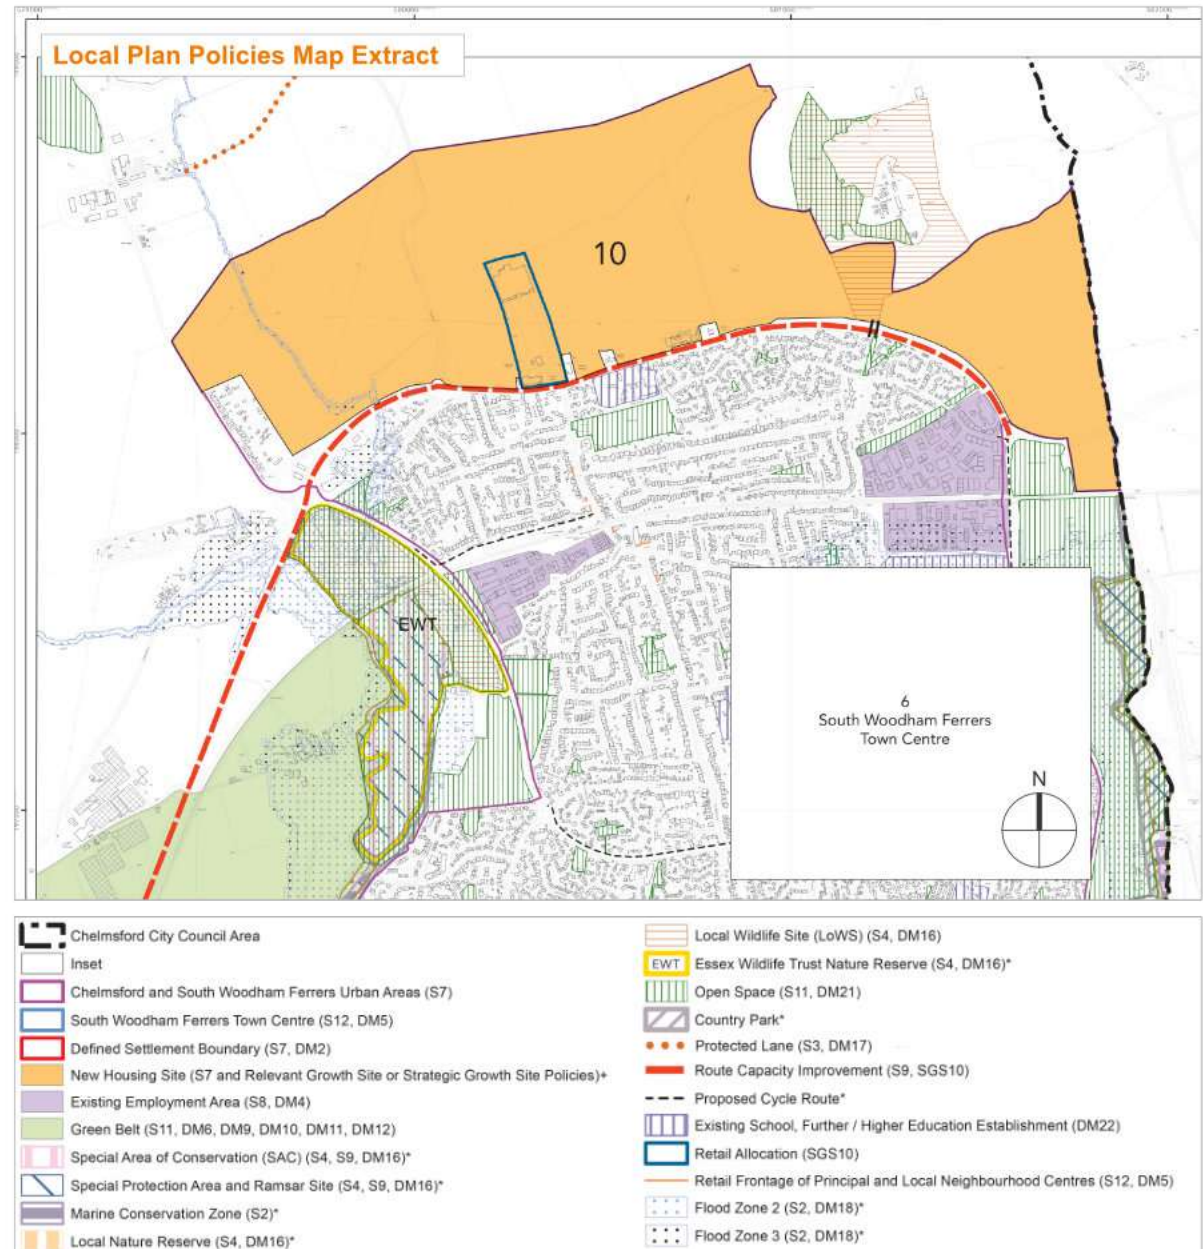

The area of land allocated in the adopted Local Plan for development North of South Woodham Ferrers is shown in orange on the adjoining plan. It extends to just over 121 ha. It abuts the existing edge of South Woodham Ferrers along Burnham Road to the south, and lies either side of the B1418, extending as far west as Willow Grove.

The site is allocated for residential development (with supporting uses and infrastructure) within the adopted Local Plan under Policy SGS10, and the development as proposed is fully in accordance with the Local Plan allocation.

Policy SGS10 requires development proposals to accord with a Masterplan that has been approved by the Council. The applicant has led the preparation of the Masterplan for the site, which started with the collation of background technical evidence about the site and surroundings, and which then led on to a community and technical stakeholder workshop in January 2020, six weeks of public consultation during June-July 2020, a Quality Design Review Panel in July 2020, and formal consultation on the amended Masterplan by Chelmsford City Council in autumn 2020.

The Masterplan was subsequently considered by Chelmsford's Policy Board in January 2021, prior to formal approval at Cabinet in March 2021. The requirement of the Policy to have a Masterplan approved has therefore been met. The development as proposed in this application is wholly consistent with the key principles established in the approved Masterplan.

This Design and Access Statement explains how the proposals establish a framework for achieving a high quality of design.

# INTRODUCTION

## EXTENT OF APPLICATION

The application site covers an area of 112.2 hectares (277.2 acres) and is located to the north of the town of South Woodham Ferrers. It is outlined in red on the adjoining plan.

The site largely composes agricultural fields adjoining the existing town, with the B1012 Burnham Road forming the southern boundary of the site. Within the western part of the site, the B1418 runs northwards from Burnham Road towards Woodham Ferrers.

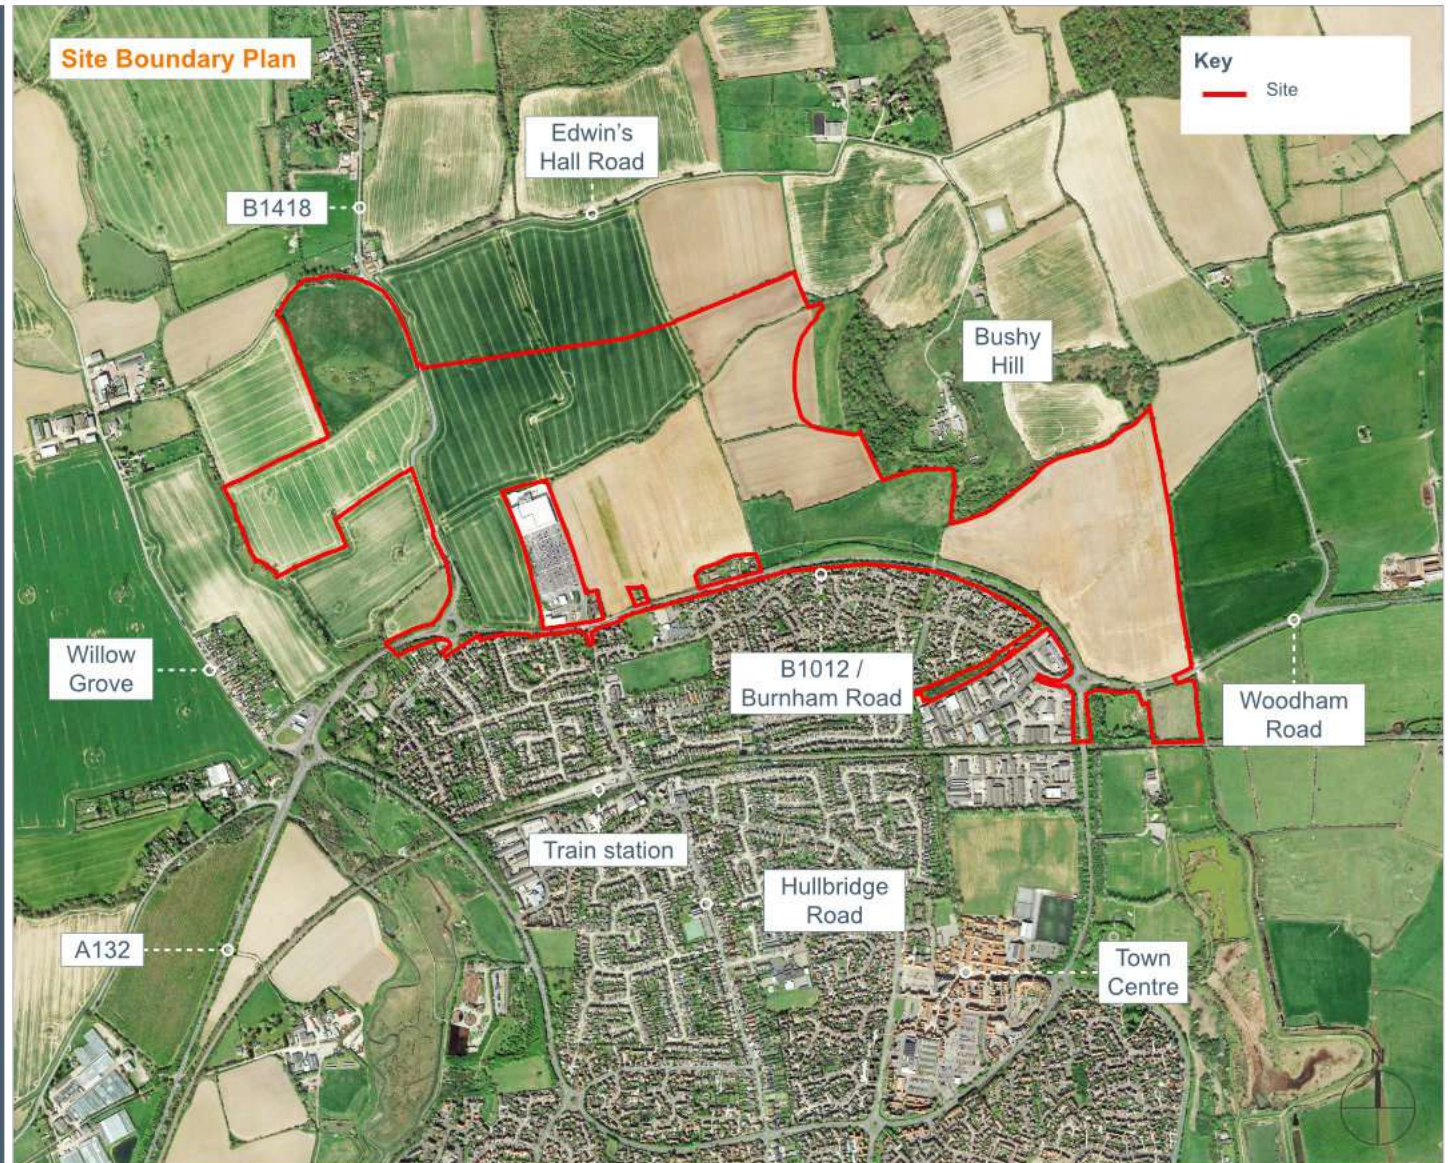

The majority of the western half of the site is relatively flat with the landform gradually rising to the north. The eastern part of the site lies on gently sloping land, again, rising towards the north.

A detailed description of the site and its features is contained later in this report.

### The extent of the site

The plan opposite shows the SGS 10 Stage 3 adopted Masterplan, with the proposed outline planning application red line overlaid.

The site includes around 85% of the land within SGS 10 as identified within the adopted Chelmsford Local Plan.

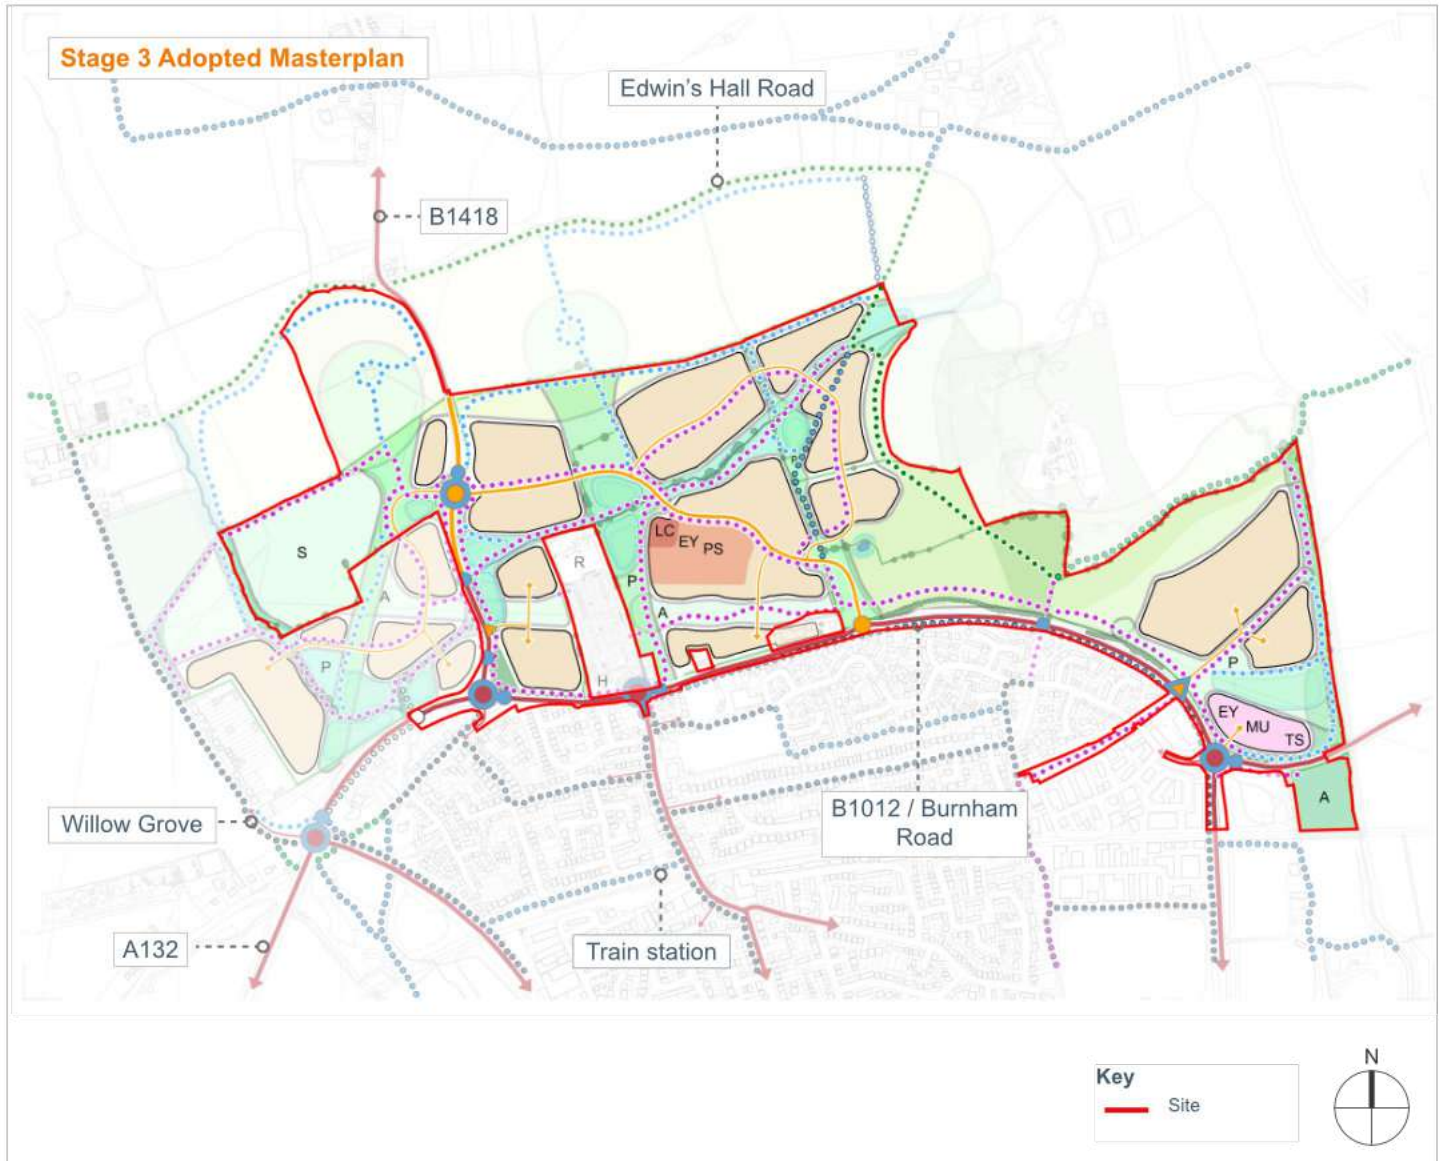

There are three main areas of land within SGS 10 which do not form part of this application:

- the already completed development north of the Burnham Road/Hullbridge Road junction comprising a Sainsburys superstore, the Crouch Vale Medical Centre, and a petrol filling station;
- Land adjoining the application site to the west, with potential for some residential development in accordance with the approved Masterplan, mostly controlled by a different landowner;
- Land including the buildings associated with Hamberts Farm; this area is likely to come forward as a small scale residential development.

There are some areas of land within the application red line outside the extent of SGS 10. These are:

- The Old Fire Station plot fronting Burnham Road adjoining the Crouch Vale Medical Centre;
- Land within Highways ownership where works associated with the application are proposed;
- Land within the north-western part of the site around Mill Hill, identified with strong potential for recreational and biodiversity benefits.

# SECTION 2 ASSESSMENT

**“Well-designed places are: based on a sound understanding of the features of the site and the surrounding context, using baseline studies as a starting point for design; integrated into their surroundings so they relate well to them; influenced by and influence their context positively; and responsive to local history, culture and heritage.”**

**(National Design Guide, 2021)**

This section describes the strategic and local context of the site, including its relationship with the existing town and its wider landscape setting, including assessment of wider transport links, landscape designations, character and facilities within the town.

**OAKLANDS MEADOWS**  
**SOUTH WOODHAM**  
**FERRERS**

ESSEX

# ASSESSMENT

## STRATEGIC CONTEXT

The site is situated to the north of the town of South Woodham Ferrers which was developed from the mid 1970's onwards as a riverside country town by Essex County Council. Today it has a population of over 16,000 people. It is the second largest settlement within the City of Chelmsford administrative area and is located approximately 17 km to the south-east of Chelmsford itself.

In terms of road connections, the A132 connects the town to the A130 and in turn to the A127 and the A12 - both of which are key radial routes into London and connect to the M25 motorway.

South Woodham Ferrers railway station is on the line that connects to Wickford and via Stratford to London Liverpool Street. London (Stratford) is a 40 minute journey. From Wickford there is also a 15 minute journey to Southend Airport.

The setting of South Woodham Ferrers is rural in character and includes a number of smaller villages such as Stow Maries, Woodham Ferrers, Rettendon and Battlesbridge. The River Crouch, immediately to the south of the town, is a key element of its setting. South Woodham Ferrers town centre is within the eastern part of the town. This contains around 100 business units and is anchored by an Asda Supermarket.

## EXISTING PEDESTRIAN AND CYCLE NETWORK

A comprehensive network of walking and cycle routes exist throughout the town, providing convenient links to key destinations and open spaces within South Woodham Ferrers (a more detailed analysis of these connections will be provided later in this document).

These routes link into the wider network of Public Rights of Way and Bridleways surrounding the town. Routes of a more recreational nature run through Marsh Farm Country Park to the south of the town, Fenn Creek to the west and to the north through Saltcoats Park.

Links to the north of the town through the site also exist. Bridleway no. 46 runs from the north of the town through the site, connecting into Bridleway 25. This provides a key link to the east of this site into the surrounding countryside and villages. Public footpath 24 runs across the site providing a pedestrian connection from the edge of the existing town to Woodham Ferrers and Edwin's Hall.

Existing footpaths and bridleways to the west of the site provide access into the countryside towards Hyde Hall and the village of Rettendon. There are currently no public rights of access across the western part of the site itself.

## PUBLIC TRANSPORT

South Woodham Ferrers is well catered for in terms of its sustainable transport links with the surrounding area.

### Bus Services:

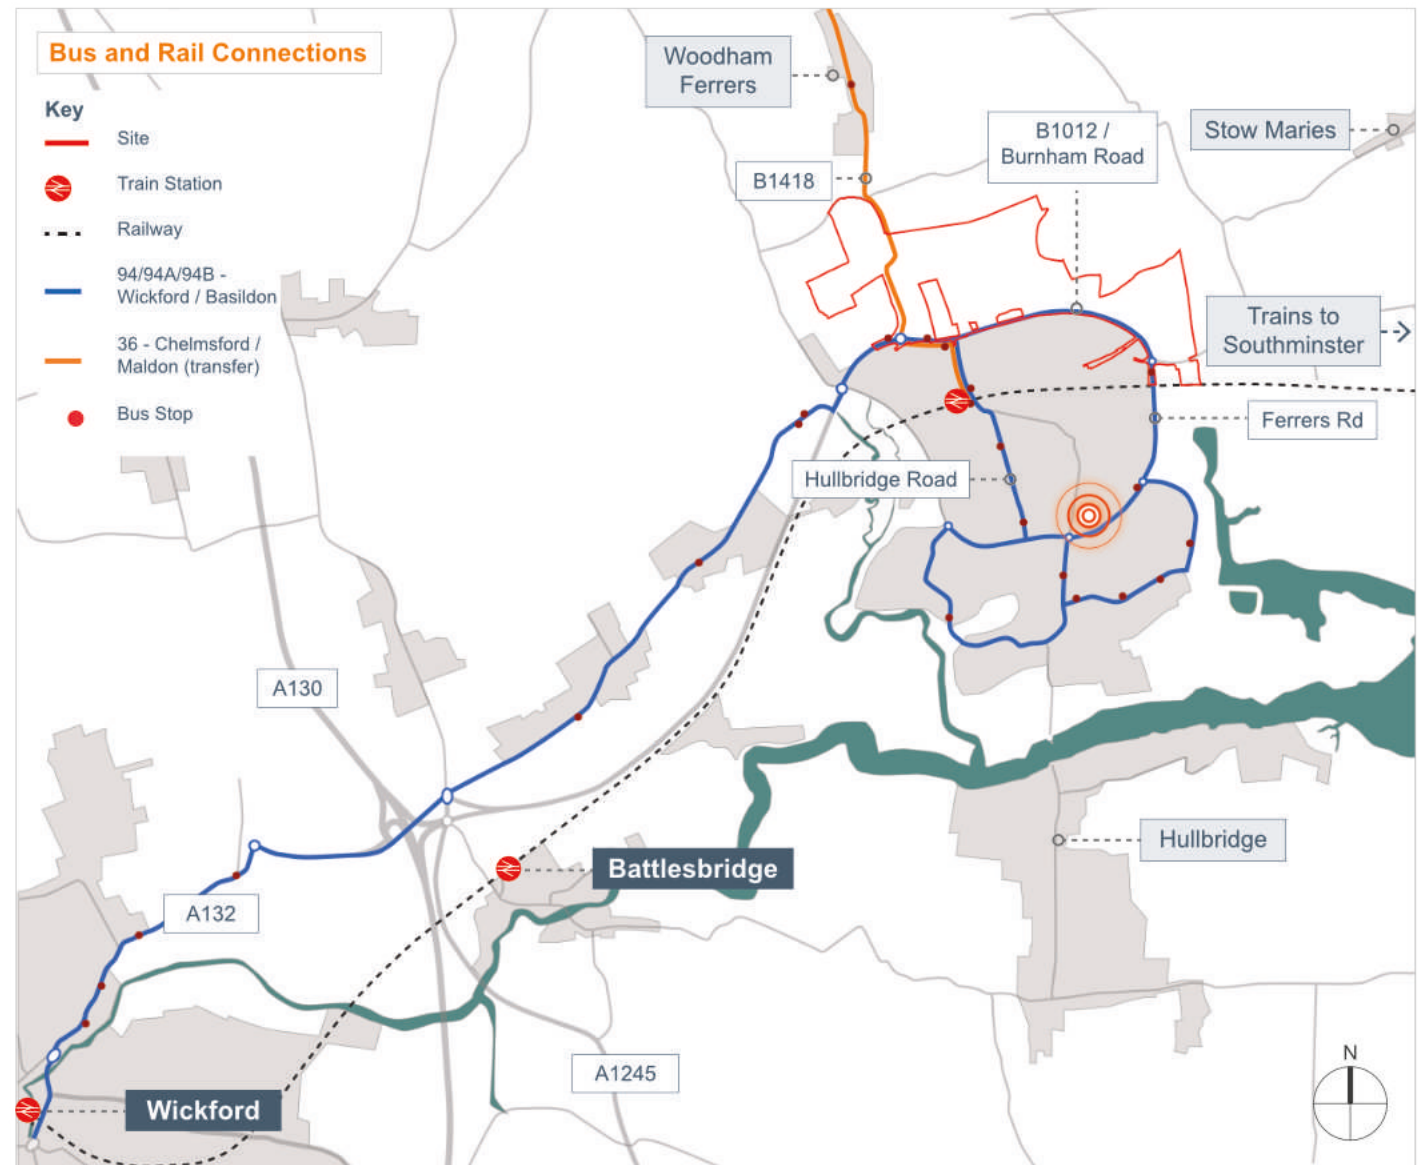

Bus links provide a regular public transport service to key local destinations. Bus service 36 to Chelmsford / Maldon runs every 20-30 minutes while services to Wickford and Basildon (94/94A/94B) run approximately every hour.

Services within the town typically run from the train station and along key spine roads and arterial routes such as Hullbridge Road, Ferrers Road and the B1012.

The site is highly accessible in terms of public transport. Its is well located in relation to strategic bus links with both services running to the south of the site along the B1012.

### Rail Services:

There are regular train connections through to London (Liverpool Street) via Wickford. These services run every 40-45 minutes with an approximate journey time of 50 minutes. Direct services also run to Burnham-on-Crouch and Southminster, these run every 40-45 minutes with a journey duration of 20 minutes.

# ASSESSMENT

## LAND USES

The town centre is situated in the east of South Woodham Ferrers and is the town's major focus for shops and key facilities, anchored by an ASDA superstore alongside bars, restaurants, post office, library, leisure centre and doctors' clinic. Further retail facilities are located close to the station and within the south western corner of the town ensuring the majority of the population is within walking distance of such facilities. Recently a new Sainsburys superstore and the Crouch Vale Medical Centre have also opened, on the northern edge of the town immediately adjoining the site. Other community facilities within the town include Town Council buildings, Village Hall and places of worship.

Within the northern part of the Town Centre is the William de Ferrers secondary school and St Joseph's Catholic primary school. Additional primary schools are located throughout the town including Collingwood, Elmwood and Woodville with the latter being the closest to the site.

The light industrial areas to the north-east and the west of the town provide significant areas of employment.

The southern, eastern and western edges of the town comprise a network of attractive parks and open spaces. A number of leisure and sports facilities are found within these including an animal adventure park and a yacht club. These uses lie adjacent to Marsh Farm Country Park which is located in an attractive riverside setting along the River Crouch. These are key points of interest within the town which are popular with local residents and visitors. Other key recreational facilities include South Woodham Ferrers Rugby club on the eastern edge and the bowling club in the centre of the town.

# ASSESSMENT

## URBAN ANALYSIS

The adjacent plan analyses the structural elements such as movement corridors, edges (real or perceived boundaries), landmarks (identifiable features) and nodes (destinations or activity areas) which give settlements their distinctive character.

### Morphology:

South Woodham Ferrers is a nucleated settlement with a clear and defined urban edge. This compact arrangement has been influenced by surrounding environmental constraints including steeper topography to the north and areas of floodplain and bodies of water to the east, west and south.

### Edges:

The town is notable for the lack of any sizeable green space within the urban area which gives South Woodham Ferrers a distinctly urban feel. In contrast, its edges largely comprise attractive natural green spaces, parks and outdoor sports facilities. These are easily accessed through a network of public cycle / pedestrian links connecting into the surrounding countryside.

Despite the adjoining attractive rising landscape, the northern edge of the town comprises a generally blank frontage due to the arrangement of existing built form with back gardens facing onto Burnham Road (B1012). Burnham Road currently has limited opportunities for crossing and therefore

forms both a real and perceived barrier to pedestrian movement.

### Key nodes and landmarks:

The town centre is the primary economic and social node with additional smaller retail services and the village hall located in close proximity to the train station. The new Sainsburys superstore and Crouch Vale Medical Centre form another node to the north of the town, adjoining the site.

The network of green spaces surrounding the site to the west, south and east including Saltcoats Park, Marsh Farm Country Park / Adventure Park and the River Crouch are also key points of interest and recreation within the town which are popular with local residents and visitors.

### Movement / Routes:

Burnham Road (B1012) currently encloses the town along its northern edge with three roundabouts along this edge serving as the primary vehicular entry points into the town.

Within the town Ferrers Road, Inchbonnie Road and Hullbridge Road serve as primary movement corridors for pedestrians and vehicles, with residential streets branching off these routes.

The railway line, running east-west through the northern part of the town, creates a physical barrier to movement and is the most notable cause of severance within the town.

## HERITAGE ASSETS

The area surrounding the site contains a number of historical assets. From formative churches dating back as far as the 13th century to a small Copyhold, these all play a role in defining the character of the area.

**Woodham Ferrers** is a historical settlement to the north of South Woodham Ferrers and is home to a number of listed buildings. The most notable building is the grade I Church of St Mary.

To the east of Woodham Ferrers sits **Edwin's Hall**, a grade II\* moated house. This well defined house, built of red brick with black brick diaper work, is situated at the end of Public Footpath 24, on the crest of a hill looking back towards South Woodham Ferrers.

**Ilgars Manor** is a grade II listed property situated to the north-west of the site. This again highlights the construction methods and representative proportions commonly found in mid 17th century timber framed houses.

**Shaw Farm** lies on the north-western

edge of South Woodham Ferrers. It is a timber framed farmhouse of 17th century origin now operating as a public house and is grade II listed.

**Wellinditch Farm** lies to the north east of the town. It comprises a farmhouse, traditional barn and modern outbuildings and like Shaw Farm, dates from the 17th century. It is grade II listed.

**Hamberts Farm**, a farmhouse and associated group of traditional and modern farm buildings within an agricultural setting to the north, adjoins the site on northern edge of South Woodham Ferrers facing Burnham Road. The buildings can be considered as undesignated heritage assets.

South-east of the town, a medieval **saltern** (Scheduled Monument) is situated on the edge of the Country Park.

# ASSESSMENT

## ECOLOGICAL DESIGNATIONS

South Woodham Ferrers lies on the northern edge of the Crouch Estuary. This estuarine landscape is highly valued for its ecological significance and is an important wintering site for migratory birds including Dark Bellied Brent Geese, being protected as RAMSAR, Special Protection Area (SPA) and Site of Special Scientific Interest (SSSI). There are areas that are also designated as Special Areas of Conservation (SAC). These areas lie predominantly to the south of the town, however, the land around Fenn Creek to the west and the land around

Saltcoats Park to the east is also highly valued for its ecological significance.

The northern edge of the town is, however, not the subject of any such designation, with the exception of the Bushy Hill Local Wildlife Site (LWS) which comprises a mosaic of acid grassland, scrub and old broad-leaved woodland. The southern tip of the Bushy Hill LWS is situated within a species poor cattle pasture, with a series of terraced slumps, important for scarce invertebrates. The LWS formerly extended eastwards, however the condition of this area has deteriorated due to lack of grassland management and a return to arable agriculture in some areas.

# ASSESSMENT

## LANDSCAPE CHARACTER

The site lies within the Chelmsford City Council F12 East Hanningfield Wooded Farmland Landscape Character Area (LCA). This character area encompasses gently rolling / undulating wooded farmland to the north of South Woodham Ferrers and south of Chelmsford.

Field boundaries are noted to be predominantly well stocked with mature trees, although the character area assessment cites a presence of simple wooden post fences and evidence of boundary loss and hedgerow gapping.

Whilst it describes a sense of enclosure associated with the network of treelined lanes and patches of mature deciduous / mixed woodland, it does also note the presence of open views across the Crouch River valley (and drained estuarine marsh) that provide a sense of place, open and framed views to wooded horizons (including those within adjoining LCAs) and open views to the urban edges of South Woodham Ferrers. It further describes the sense of tranquillity as being disturbed to the south of the area by activity associated with South Woodham Ferrers and the A130 / A132 road corridors.

The lower lying land to the west, south and east of the town falls within the D9 Fambridge Drained Estuarine Marsh Landscape Character Area. The site and its immediate environs do not share the characteristics of this LCA.

The F12 East Hanningfield Wooded Farmland Landscape Character Area is assessed as having a relatively high sensitivity to change.

# ASSESSMENT

## ACCESS AND MOVEMENT

The southern boundary of the site is defined by the B1012 Burnham Road. This continues south-westwards beyond the town, becoming the A132 and forming the main vehicular access route to and from South Woodham Ferrers. The B1012 continues east from the town along Woodham Road, either side of which the easternmost parts of the site are located.

Within the western part of the site, the B1418 leads northwards from Burnham Road towards Woodham Ferrers and Bicknacre. To the west of the site is Willow Grove, an unclassified local road that leads to Hyde Hall and East Hanningfield.

The key vehicular route from the site into the town is Hullbridge Road, which leads directly to the railway station and then into the wider town.

A network of cycle routes exists within and around the town, generally on street but with some off road and bridleway routes. However dedicated cycle routes around the northern edge of the town, along Burnham Road or within the site, are currently absent.

There is a well-developed network of Public Rights of Way in the local area, with a pedestrian route around the southern side of the town through Marsh Farm Country Park. From the site, pedestrian and cycle linkages into South Woodham Ferrers can be made across Burnham Road south-westwards via Old Wickford Road, south towards the railway station via Hullbridge Road, south towards the town centre via Bridleway 46, and south towards Saltcoats Park via Ferrers Road.

There are two Public Rights of Way which cross the site. Footpath 24 runs north from Burnham Road adjoining Hamberts Farm toward Edwin's Hall, from which connections with the wider network can be made. Bridleway 46 provides access south to the town centre and links with bridleway 25 which runs east, skirting the south-eastern part of Bushy Hill, before joining Woodham Road.

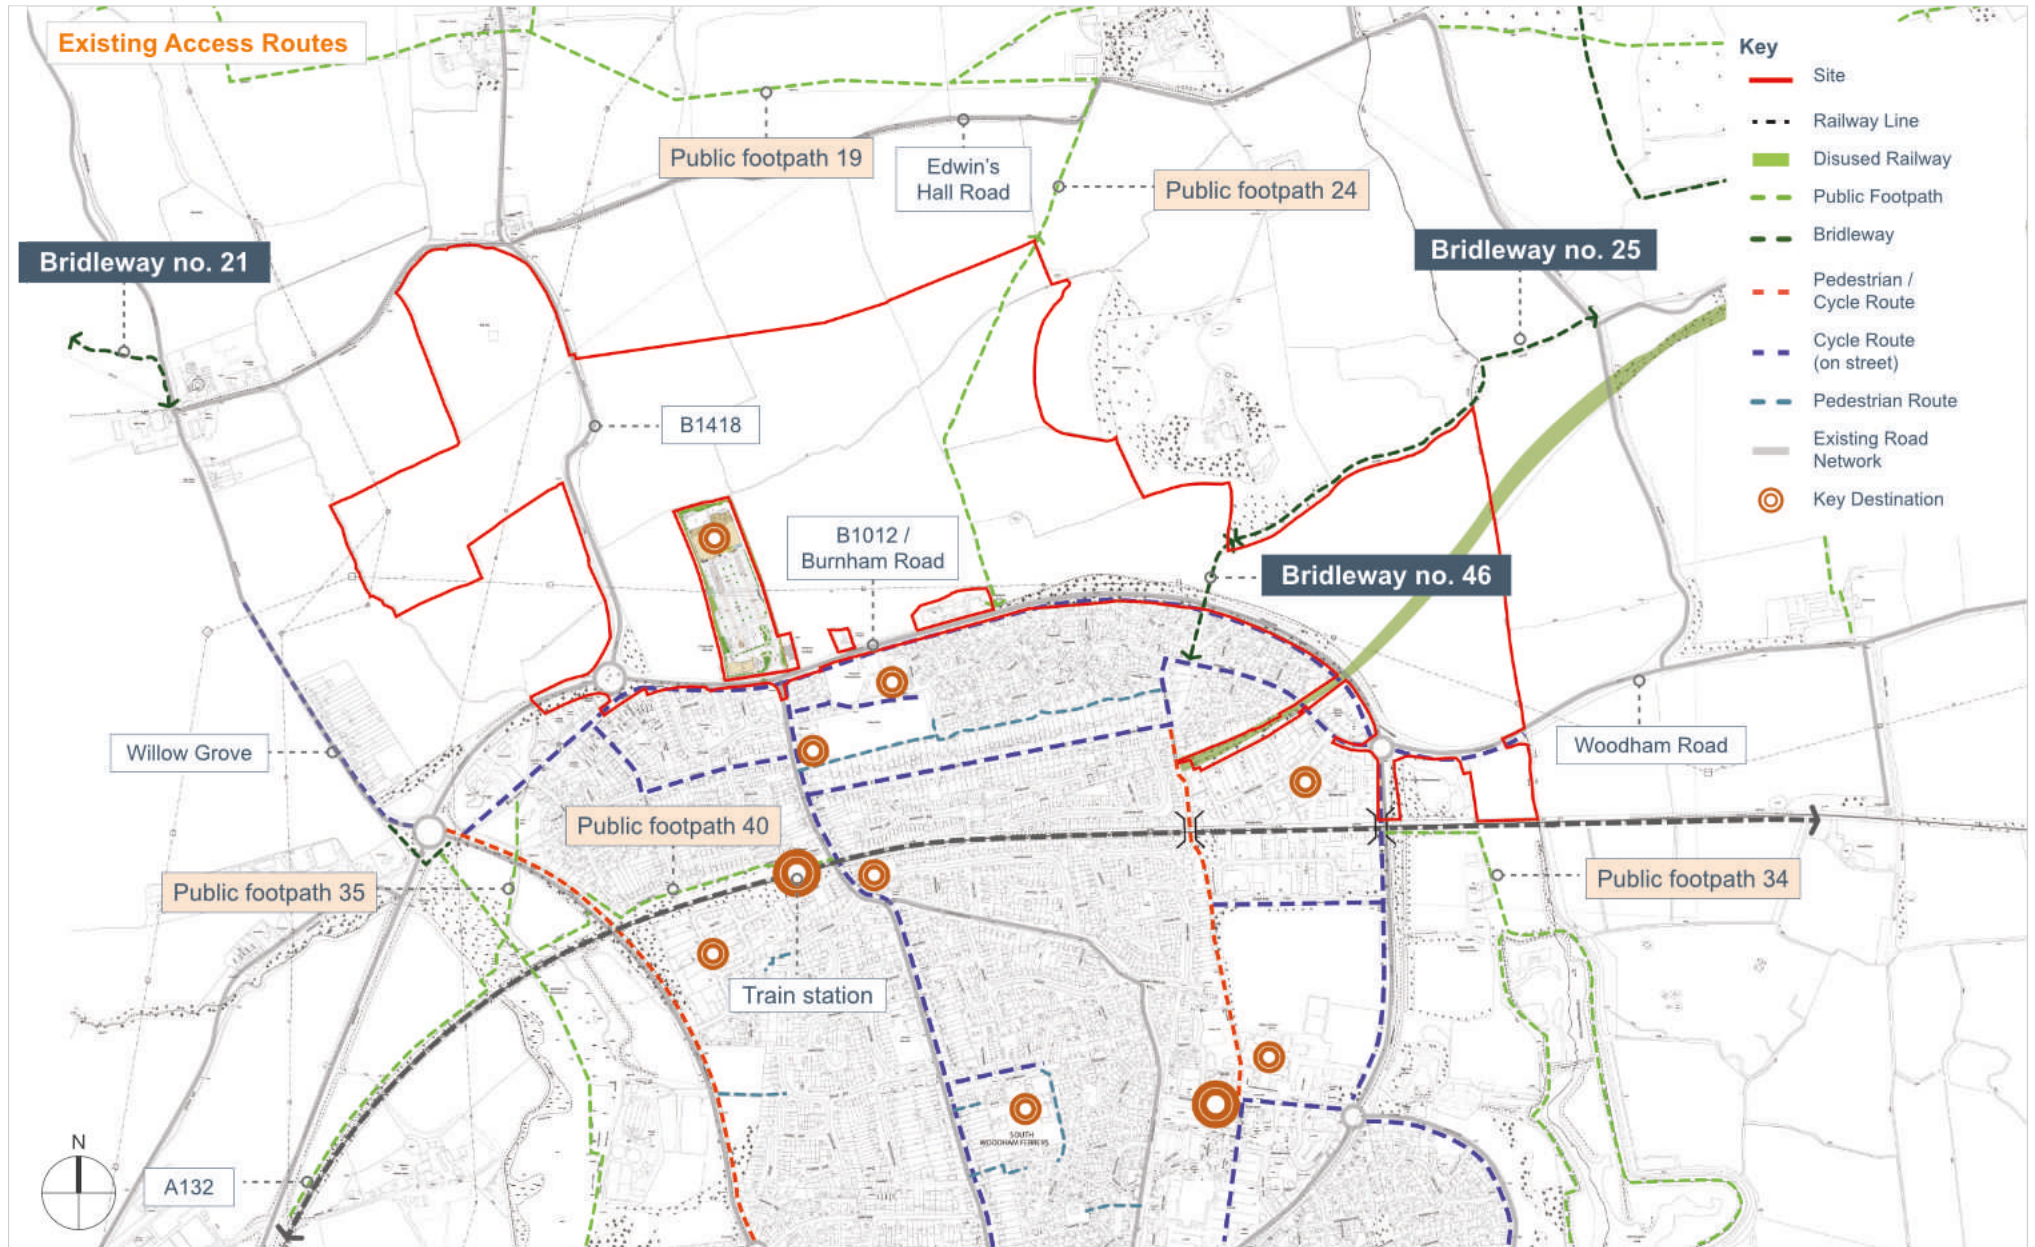

To the north of the site, Footpath 19 provides an east / west route, but there are no current east / west routes through the site.

Bridleway no.46 provides links into South Woodham Ferrers from the site

Public footpath 24 looking south from Edwin's Hall Road

# ASSESSMENT

## TOPOGRAPHY AND VIEWS

The site lies on the boundary of two landscape character areas, both defined by distinct landforms. One is rolling Essex farmland and the other is a low lying estuarine landscape. The site slopes down toward the town, with high ground along Edwin's Hall Road and around Mill Hill and Bushy Hill. It forms the backdrop to the town in some views from the south.

The topography of the site is in two parts. The western and central areas west of Bushy Hill are relatively flat, dropping from around 18m AOD in the centre of the site to 8m AOD in the southwest corner. To the north and east of this area the land rises steeply, with gradients often more than 1:15, to the higher ground along Edwin's Hall Road and east to Bushy Hill. The top of Mill Hill is approximately 40m AOD, Bushy Hill and Edwin's Hall Road are both around 60m AOD. A valley formation and stream is evident through this central part of the site, rising in Edwinshall Wood and draining south westwards toward Fenn Creek.

The eastern part of the site falls from Bushy Hill towards Woodham Road at approximately 25m. Again gradients

of over 1:15 are reached in places.

The series of viewpoints identified offer an overview of the views into the site and beyond from publicly accessible routes. The views are shown on the following two pages. A description of each is provided here:

**View 1:** This view is taken from beyond the western boundary of the site and portrays the character of the land west of the B1418, showing a relatively flat landform with the constraints of the pylons. Glimpses of the site beyond are visible through the field boundaries.

**View 2:** The view is taken at the bottom of Mill Hill from the B1418 looking across the site with glimpsed views of South Woodham Ferrers beyond. It portrays the character of the site when approached from the north and the visual connection between the proposed site and the town.

**View 3:** A view from the north-east, approximately 300m from the site boundary, illustrates the character of the central part of the site, between Bushy Hill and the B1418. This view also emphasises the undulating landform and its role in screening the site.

**View 4:** An expansive view taken from the north-east corner approximately 250m from the site boundary portrays the

context of the site. Bushy Hill on the left-hand-side and Mill Hill on the right frame the view, screening parts of the site beyond. The densely vegetated corridor along the route of the brook is clearly visible and crosses through the heart of the site. This view also shows the visual relationship of the site with South Woodham Ferrers.

**Views 5 and 6:** Views from Woodham Road east of the site portray the character of the eastern-most field within the site boundary. They show that the majority of the site is screened from eastern views by Bushy Hill, the only part visible is the eastern most field.

**View 7:** Taken from the Crouch Estuary, this viewpoint represents the distant views of the site from the open landscape south-east of the site, due to distance, topography, and vegetation, only the eastern-most field is visible.

**View 8:** This view from the junction of Burnham Road with Woodham Road illustrates the limited visibility of the site along Burnham Road. In most locations, only glimpsed views are afforded through the existing vegetation.

**View 9:** This view looks across Burnham Road up Bridleway 46. From this location, either side of the bridleway, the site is

screened from Burnham Road by the existing planting and topography.

**View 10:** This view looks across Burnham Road up Public Footpath 24, beside Hamberts Farm. Glimpsed views of the site are afforded through the existing vegetation.

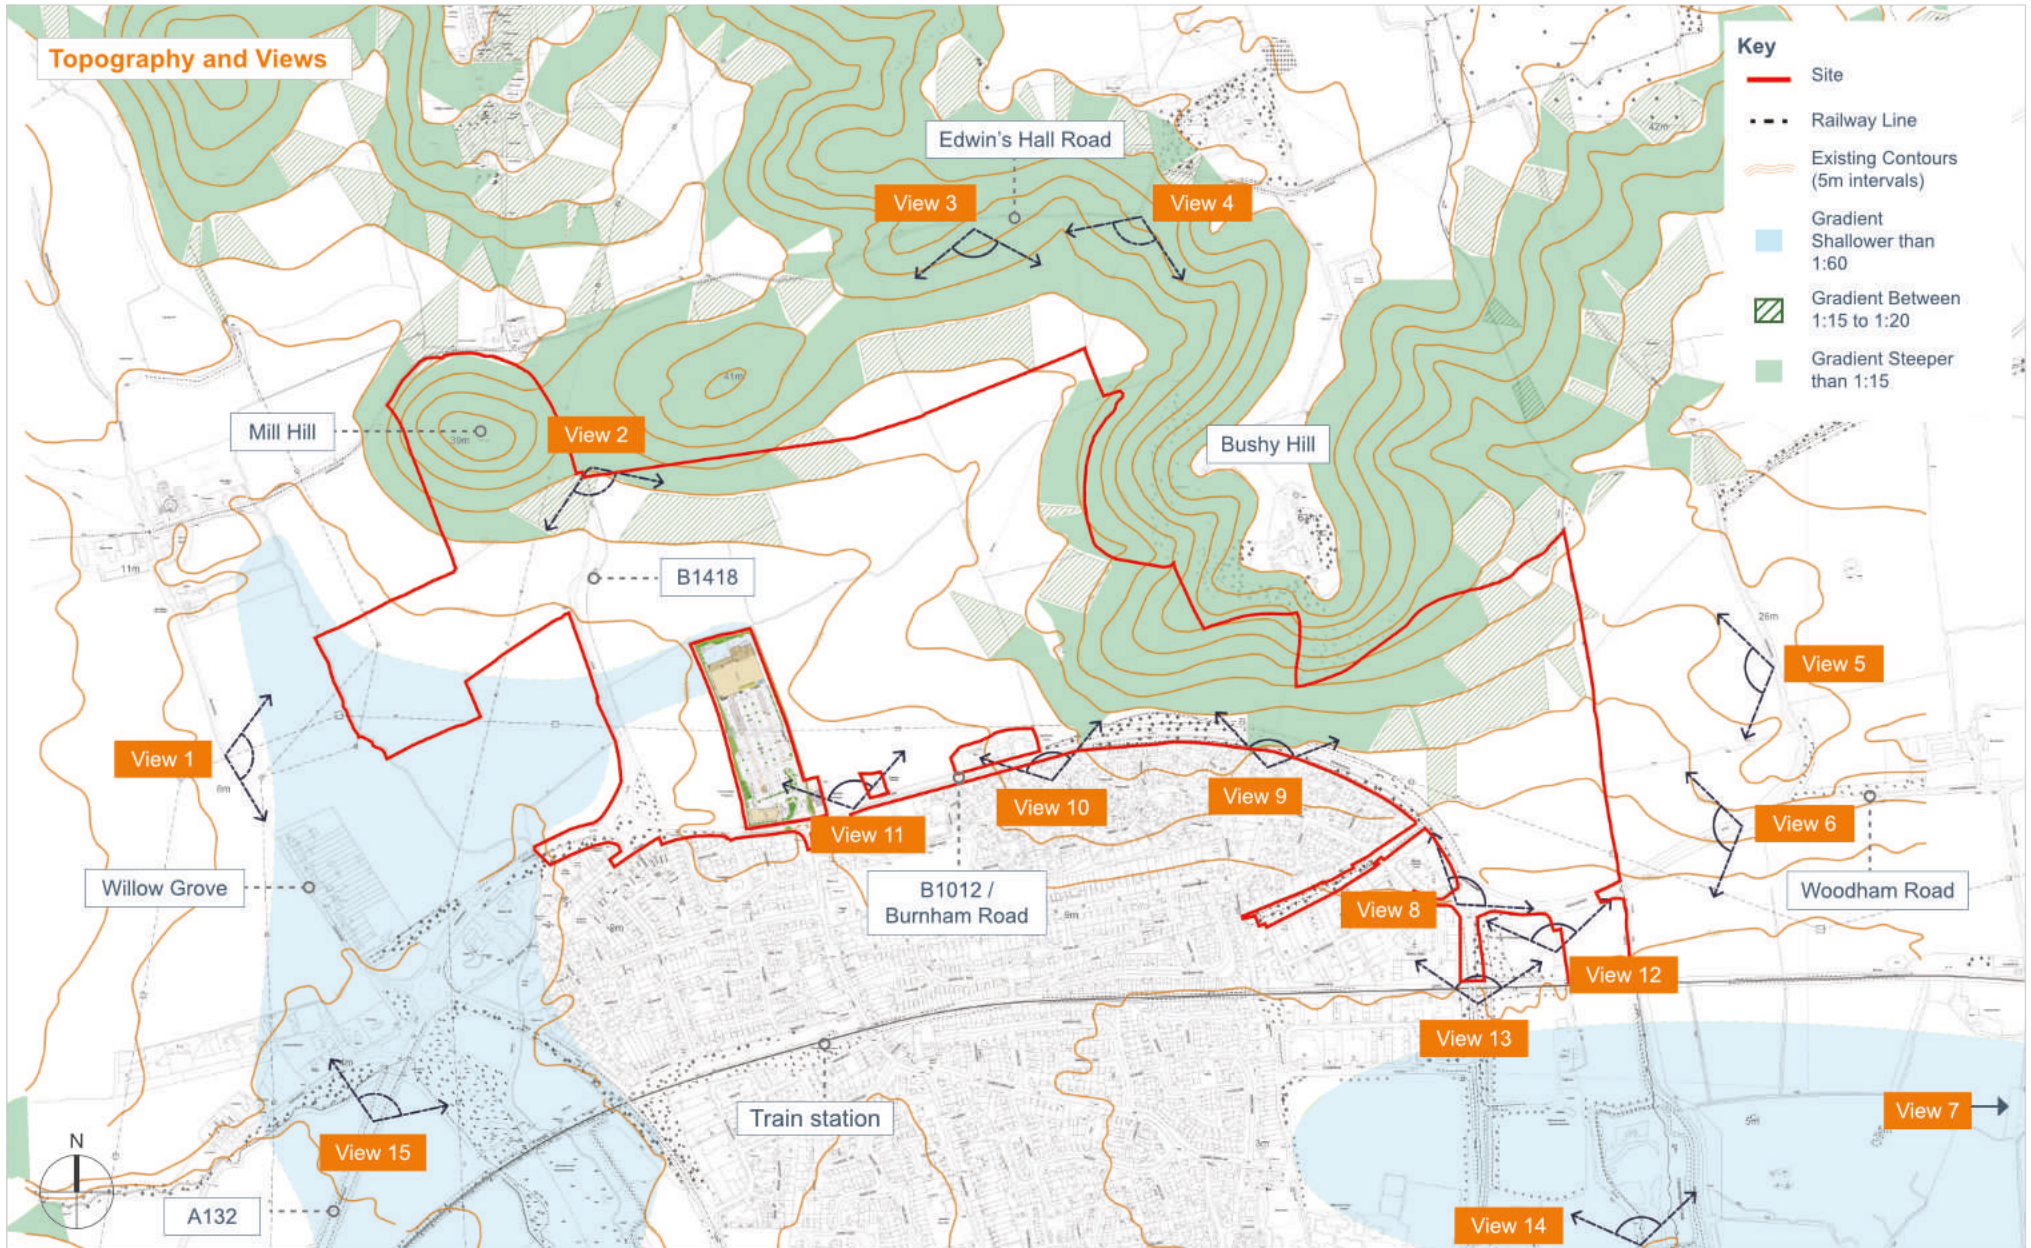

**View 11:** This view is taken approximately midway along Burnham Road and shows a wide opening in the field hedge and vegetation creating a rare opportunity for a long distance view across the site to the higher ground and countryside beyond. This visual connection makes this a key viewpoint.

**View 12:** This view shows the eastern part of the site from the Memorial Garden south of Woodham Road.

**View 13:** This view from the railway bridge on Ferrers Road shows part of the eastern most field, framed by existing trees along Ferrers Road.

**View 14:** This is a more distant view of the eastern part of the site from Compass Gardens.

**View 15:** This is a more distant view from Burnham Road to the south-west, with a glimpse of the higher ground to the north of the site above the tree line which screens the site itself.

# ASSESSMENT

## VIEWS TOWARDS THE SITE

From Willow Grove, beyond the site's western boundary, looking east

From the B1418, at the base of Mill Hill, looking south

From adjacent to Edwin's Hall Road, looking south
